

## **CSCI 4341**

### **Assignment 2 (100 points)**

This assignment is an individual assignment, but many people will work on the same paper, so you may want to work with them as well. Review one of the “Game Papers” on the website. This should be done in 3-5 pages (single space 12 pt. font) according to the guidelines posted on the website.

When this is turned in, you need to explain the main reduction in the paper to me (or one of them if there are several). This will include explaining the problem to reduce from, the problem to reduce to, how the reduction works, and why it must be true.
